

The Most Advanced Radiation Oncology Technology In Rhode Island. Now at Roger Williams Cancer Center.

Our New Linear Accelerator Provides Incredible Accuracy and Patient Safety.

Roger Williams Radiation Therapy/21st Century Oncology, part of the Genesiscare network, has acquired the remarkable **Versa HD** linear accelerator from **Elekta**. This stunning new technology allows radiation treatment of cancer tumors with pinpoint multi-dimensional accuracy, including pitch, yaw and roll alignment that achieves accuracy with 2-3 millimeters of the target. This enables more effective management of the cancer while minimizing the impact of treatment on the patient's quality of life.

This is a level of ultramodern therapeutic technology that is unparalleled anywhere in Rhode Island. It will improve clinical outcomes as well as patient quality of life following treatment. And, it underscores Roger Williams' leadership in providing Rhode Islanders with convenient access to all modalities of cancer care, including surgical, medical and radiation oncology and bone marrow replacement therapy.

To refer the patient to the radiation oncology team please call 456-2690

To refer the patient to the cancer center please call 401-456-2077
